- NodeJS & Express
- REST APIs
- Version Control (Git)
- UX/UI (User stories, User flows)
- Responsive web design

PROJECTS

RECIPE APP

Personal Project, Careerfoundry, July-September 2023

- Created a full-stack web application using Python, Django, and a SQLite database at the backend.
- Created responsive HTML and CSS-based pages at the frontend following the MVT architecture.
- Enabled user authentication and content creation, allowing users to post, edit, and delete recipes on their profiles.
- Implemented useful site statistics and visualizations based on trends and data analysis.

MYFLIX APP

Personal Project, Careerfoundry, April 2023

- Built both the server-side and client-side of a movie web application where users can browse movies, add and remove movies to their favorites list, and update their profile information.
- Utilized Node.js and Express to create a RESTful movie API to be stored in a MongoDB database and tested with Postman.
- Developed a responsive singe-page application using React and Bootstrap with several interface views.

EXPERIENCE

Teller, TD Bank, August 2023-Present

- Perform customer transactions including deposits, withdrawals, loan and safe deposit box payments efficiently.
- Respond to and resolve customer inquiries and concerns using standard procedures.

Account Coordinator, Day One Agency, August 2021-May 2022

- Develop press materials for upcoming PR campaigns including media lists, pitch materials, coverage reports, and media briefings.
- Manage daily clientele monitorings for brand and executive mentions across the digital/print news space.
- Identify new press opportunities and support media outreach efforts for the Media Relations team.
